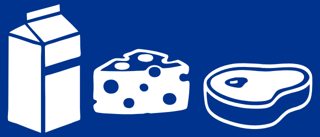
WHAT DOES IT MEAN FOR FOOD MANUFACTURERS?

The 3 pillars for a successful omnichannel strategy

OMNICHANNEL STRATEGY

IDENTIFY HIGH POTENTIAL MARKETS

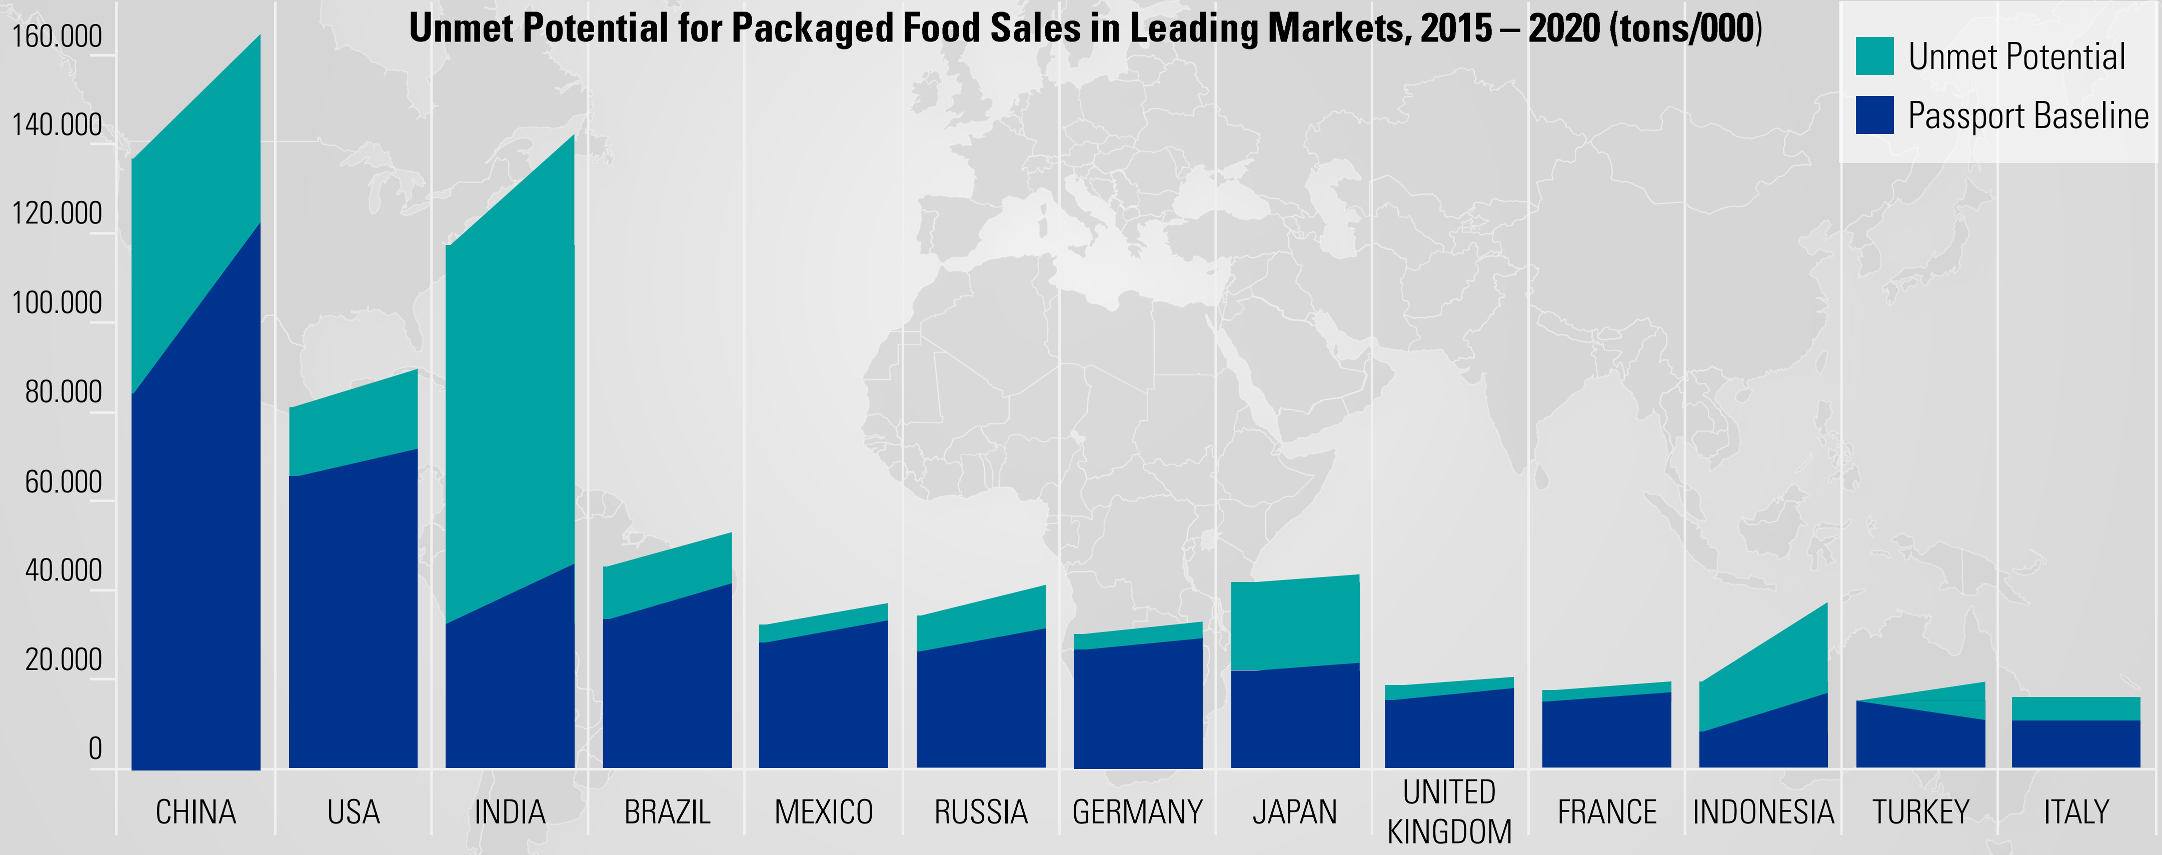


SELECT THE RIGHT PRODUCT MIX

INTERACT WITH NEW PLAYERS & PARTNERS

Identify high potential markets

Beyond China and **India**, **unmet food potential** relatively **restricted**, **especially in Western Europe**, where Countries are expected to face low GDP growth and possess stable populations.



Identify high potential online markets

Potential of online channel is conceptualized taking into account three categories of measurable factors:

DEMOGRAPHIC FACTORS

- Household by Type (e.g. Single Person, Couple with Children)
- % population
- Population by Age Segmentation (e.g. Age 20-39, 40-59)

BUSINESS ENVIRONMENT

- % Market share of top 5 Modern retailers
- Number of top 5 modern Grocery retailers with Pre-Existing online ventures
- % of total Grocery Sold via Online Shopping

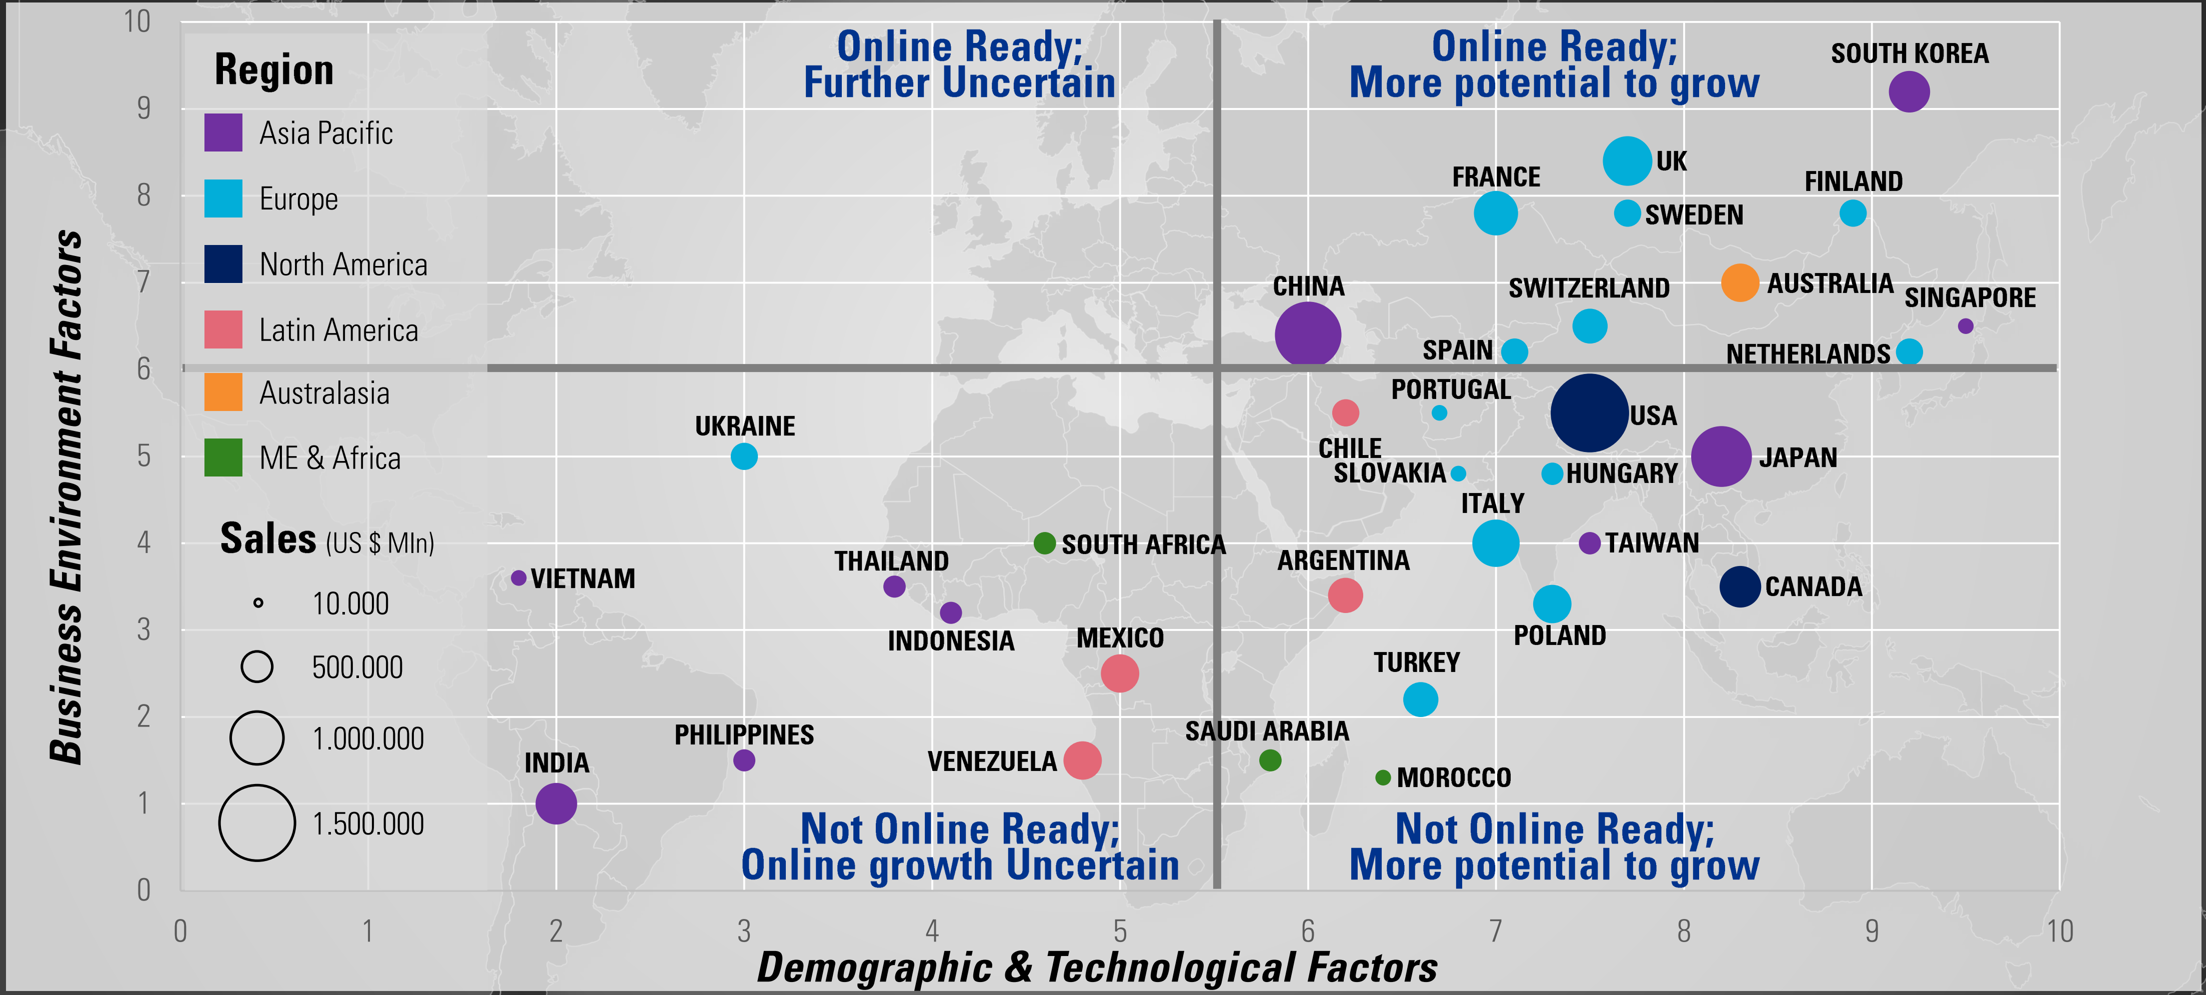
TECHNOLOGICAL FACTORS

- % of total population with internet Access
- % of total population with Broadband Access

KPMG

Identify high potential online markets

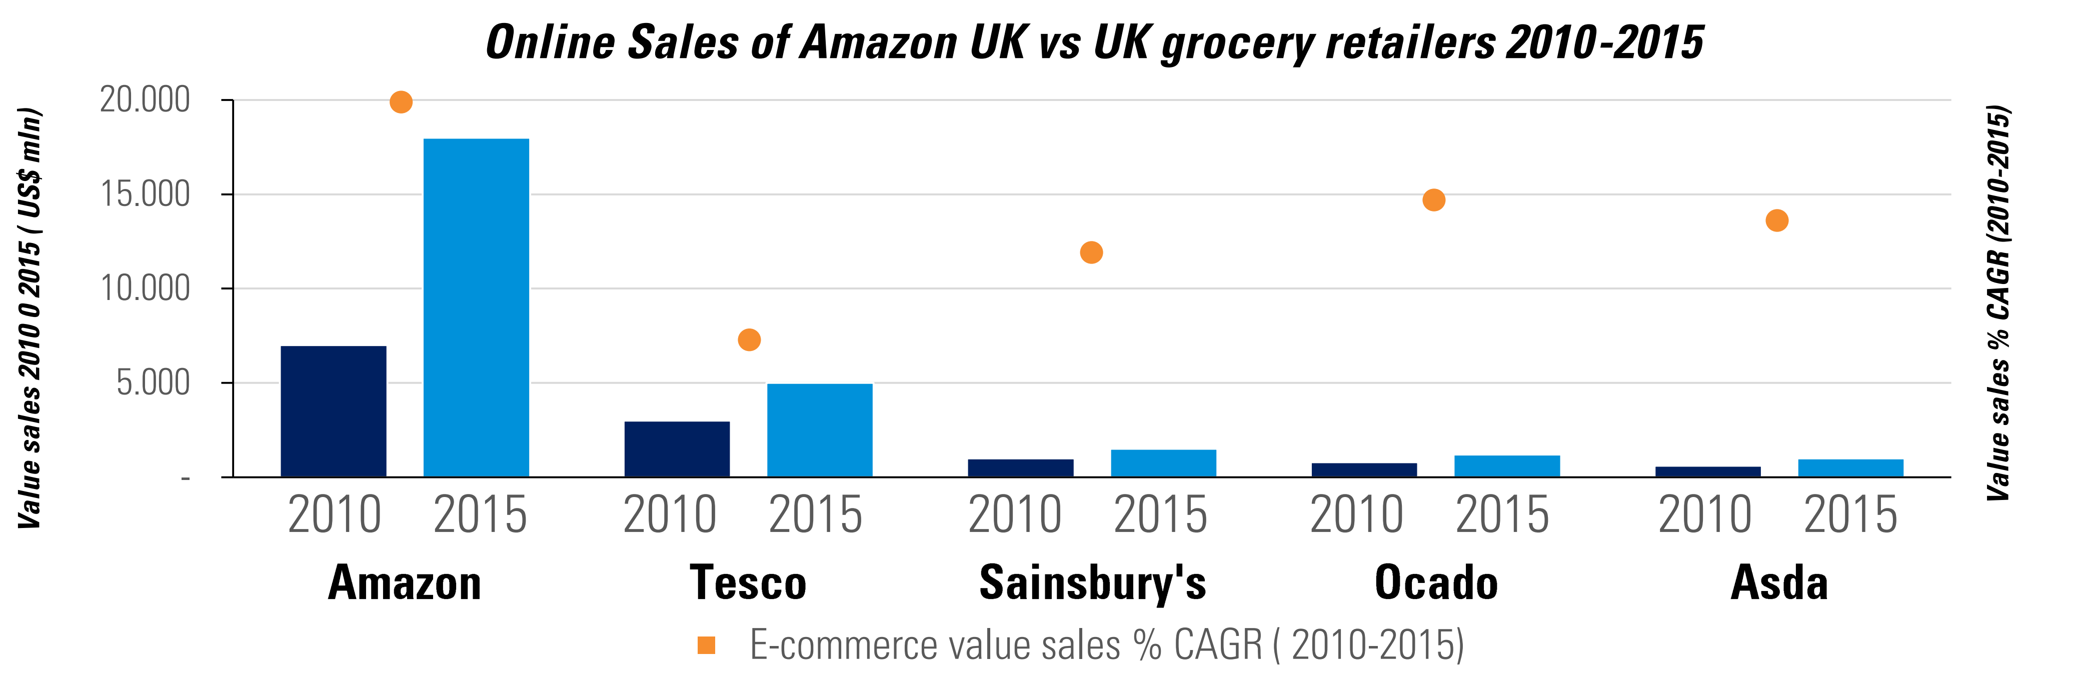
Online Grocery Shopping Market Potential and online Market Sales (US$ Mln) - 2015



Identify high potential online markets - UK

The **UK market** represent a successful example of the huge potential brought by **digital,** where grocery retailers invested in digital as a channel driving its expansion.

Amazon digital retail market share is today **25%**, and **food manufactures** will have to **transfer** some **focus on online to succeed**



Sources: EuroMonitor; KPMG Analysis

Identify high potential online markets - India

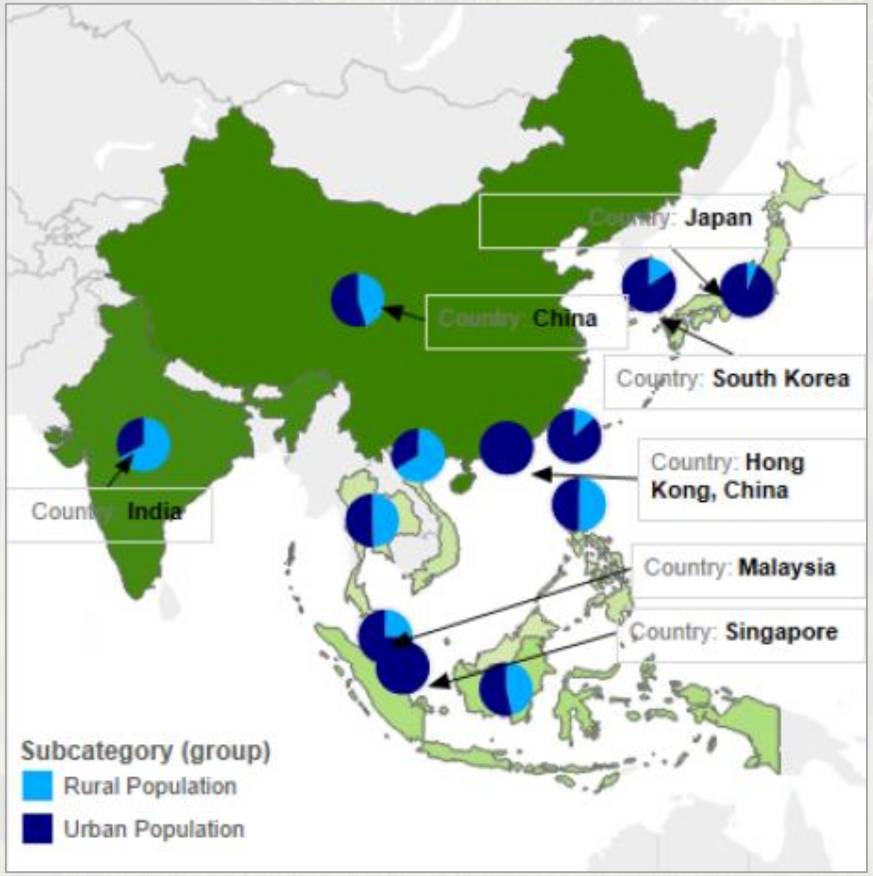
India's chances of online success a distant prospect

India is still **mainly rural** with **poorly developed distribution** and **logistic infrastructures**

Only **24%** of Indian population will have **broadband by 2020**

Modern grocery retailers account for just **1%** of total market, and food companies must use **social media** for reaching target consumers.

Breakdown of population in the APAC region, by social class

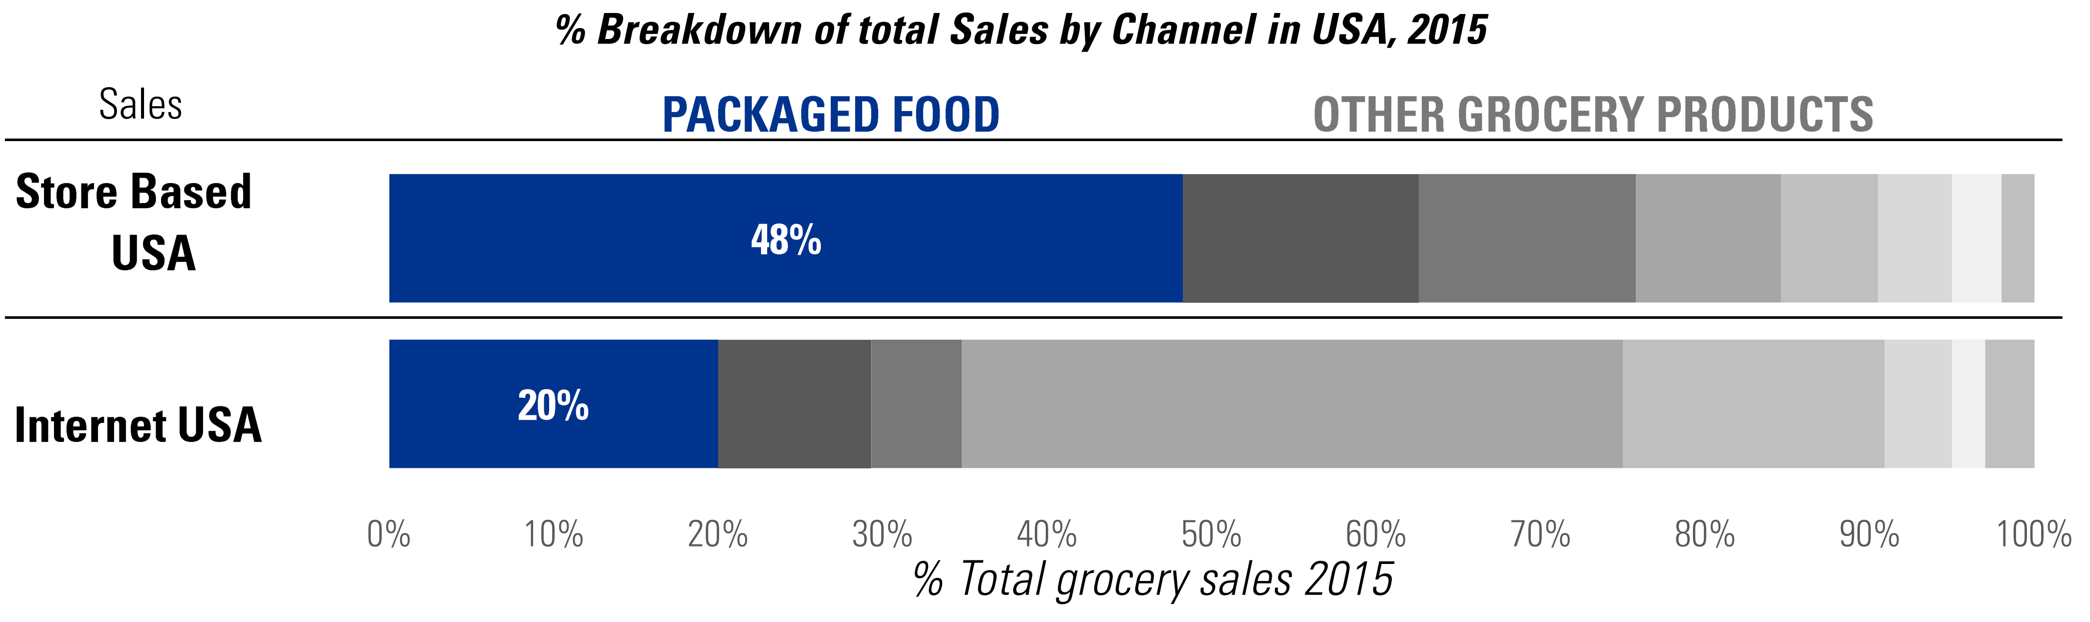


Identify high potential online markets - USA

Online food spending in **US is weak** due to **inexpensive petrol** and widespread **car ownership** (89%) and **high delivery fees** that favor **physical shopping**.

In addition, consumer are **more skeptical** and worried about **food quality**.

Overcoming this perception is the **biggest challenge on US market**



Sources: euroMonitor, KPMG Analysis

Identify high potential online markets - France

France benefits from heavy "drive-thru" promotion

In **France**, food sales **online are larger than offline**, with French retailers committed in promoting **"drive-thru"** experiences

This is a **win-win** situation, with online retailers benefitting from a **lighter cost structure** and buyers experiencing more **convenient purchases**

RECOMMENDATIONS

No 'one size fits all' approach for global online strategy

1. Identify **markets** and seize **opportunities**

2. Select the right **online channel**: brand website or retailer website

3. Product mix will be a mixture of value for money and exclusive online options

4. Interacting with **new players** such as Amazon, Alibaba and Ocado

5. Impulsivity will be re-imagined

6. Evolve the **value chain** and **operative model**

7. Develop a coherent **omnichannel strategy**
